

HU-FRIEDY PEDO CROWNS

Stainless Steel Primary Molar Crowns

FACT

Primary molars can exhibit excessive decay or be prone to fracture due to trauma or extreme wear.

CHALLENGE

Even though primary molars are eventually lost, the pediatric dentist must still find a solution that is efficient and versatile for restoring these teeth in order to offer the patient proper tooth function, occlusion and space maintenance.

SOLUTION

Hu-Friedy Stainless Steel Primary Molar Crowns offer excellent patient results by providing optimum occlusion, proper space maintenance and ideal thickness to resist abrasion and perforation.

POINTS OF PERFORMANCE

These stainless steel primary molar crowns were developed to deliver consistent, accurate and predictable clinical outcomes, while allowing the practitioner to work more effectively and efficiently, ensuring more time for value-added services such as patient education and treatment planning.

- **Pre-trimmed and crimped**, for quick and simple placement
- **Accurate occlusal anatomy** that mimics the natural tooth
- **Ideal occlusal thickness**, offering superior resilience to abrasion and perforation
- **Soft, adaptable gingival margin and lateral areas** for simpler and effortless trimming and crimping, if needed
